Monthly Catalog of U. S. Government Publications

Public Laws

U.S. Code

All databases are available as ASCII text files. Most databases provide Adobe Acrobat Portable Document Format (PDF) files. Users with the appropriate Internet connection and free Adobe Acrobat Reader software can display and print typeset pages, including embedded graphics. For some 1994 databases and those with no equivalent printed product, graphics are provided as individual TIFF files.

Most databases are updated by 6 a.m. est daily. The *Congressional Record* is usually available by 11 a.m. est depending on the previous day's adjournment.

U.S. Fax Watch

or more information on databases online via *GPOAccess* ontact U.S. Fax Watch at 202-512-1716 from your phone or ax machine.

Anyone can obtain official Federal information online via *GPO Access*. We support users who have Internet, telnet or dial-in capability, as well as those who do not have access to a computer. You can access official Federal Government information quickly and easily through the following methods:

With a WWW browser through the Superintendent of Documents Home Page:

http://www.access.gpo.gov/su_docs

You can connect to *GPO Access* from your home or office through depository library "gateways". Listings of depository library "gateways" can be found through the SuDocs Home Page and U.S. FaxWatch.

With a WAIS client and a full Internet connection. Customized EINet WAIS client software for Windows or Macintosh is available for \$15 per copy.

Telnet: swais.access.gpo.gov; login as guest.

Dial-in through modem 2 02 512-1661 (Settings: 8, N, 1); type swais; login as guest.

If you do not have access to a computer you can visit one of the 1,400 U.S. Federal Depository Libraries that maintains on-site public access workstations. A searchable listing of depository libraries offering this service is available through the SuDocs Home Page.

Provides access to records that identify and describe public information resources within the Federal Government and assists users in obtaining the information.

Provides information on what is available online from the Federal government on various topics. Classifies government and military sites under approximately 170 subjects, based on the subject terms used in GPO subjectbibliographies.

Provides an overview of government information products available electronically. Lists electronic government information products available on Federal government servers, arranged alphabetically by agency.

Contains a simple search form enabling you to query a database of information collected on a regular basis from official government sites.

Allows you to search and locate information products available through the Federal Depository Library Program. Cataloging records published in MOCAT since January 1994 are contained in this database.

Instantly locate current GPO sales information through the GPO's complete sales catalog - the PRF. This online database enables you to instantly check the availability of new information products and recently out-of-print items, access GPO sales information and place an online order.
